

## Ingredient Batching Machine

Ingredient Batching systems designed and manufactured by Infinity Automated Solutions Pvt Ltd is designed for ease of operations. This machine ensures the exact recipe with exact batch size of the final product which consist of 2 or more ingredients . This ensures the secrecy of your recipe and saves the time of manual batching .

The production batches used for different ingredients could be segregated as per the will and wish of the user. The logical controls allow these activities. This powder batching system is widely used in food and spices industries in particular.
