

We value your health

**NAPL**

Nagpur Aquatech (P) Ltd

≡ Total Water Management Solutions ≡

NAGPUR AQUATECH PVT. LTD (NAPL) established in 2004, is an ISO 9001:2008 certified organization specializing in manufacturing of all kinds of water treatment equipments.

NAPL has got a vast portfolio of water technologies including Electro Chlorination, RO, Ozonation, Fully Automatic Microprocessor based Dosing Systems, Zero Maintenance Softeners, all types of filters as well as Fluoride & iron removal systems.

We have a very strong management comprising of Highly Experienced Engineers from BITS Pilani, LIT as well as MBAs together treating more than 400 million litres of water everyday.

In order to promote service quality to customers and create a situation where "everybody wins" we have established a strong professional sales, technical, R & D and service team. Satisfaction of the customer is the key performance index of NAPL.

With these salient features we are one of the most trusted organizations, engaged in offering effective solutions for water treatment at both industrial as well as domestic levels.

## Our Products At Industrial Level

### FILTRATION PLANTS

Sand Filters & Dual Media Filters used in water purification for treating raw water to produce clear water

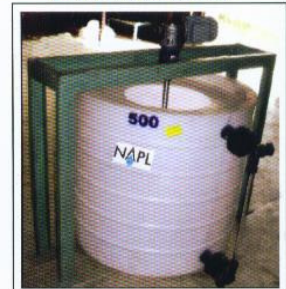

### COMMERCIAL RO

For removal of chemical and biological contaminants.

### DOSING SYSTEM

Chemical Dosing Tanks and Agitators

### FLOW METERS

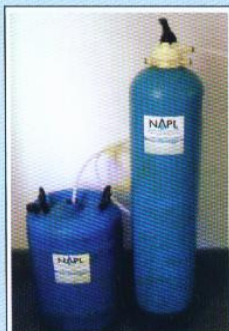

Flow Meter Installed at Butibori

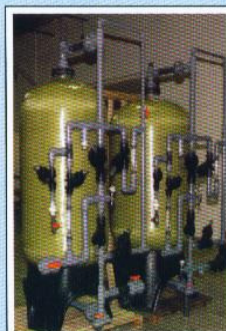

Electromagnetic & Ultrasonic

### WATER SOFTNER

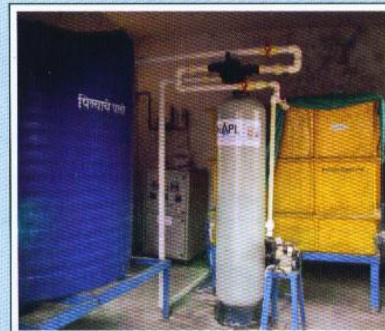

For removal of Hardness from water.

### DE MINERALIZER PLANT

For Removal of ions (Cations and Anions)

### FLUORIDE REMOVAL PLANT

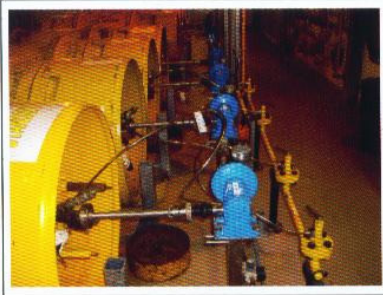

For Removal of fluorides from water

**AUTO CHLORINATION**

**GAS CHLORINATOR**

**INSTRUMENTATION**

Online And Lab Instrumentation

**CHLOROSCRUB**

Makes the handling of chlorine gas safe and provides the much needed safety in case of chlorine leak.

**ELECTRO CHLORINATION**

Unique Onsite Hypochlorite Generator.

**CHLORINE-DI-OXIDE GENERATOR**

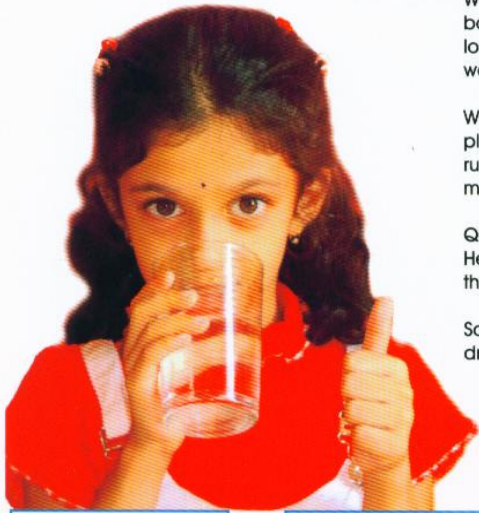

For Chlorination of Water in Cooling Towers

**SOME OF OUR ESTEEMED CLIENTS ACROSS INDIA**

## Our Products At Domestic Level

Water is essential for the survival of life. Clean water is one of the most important needs of our bodies. But it is a sad fact that something as essential to life as clean drinking water can no longer be granted to us. Unsafe water is not just the third world problem, infact; safe drinking water is even harder to find in industrially developing countries like India.

Water obtained from any source whether drawn from a well or processed in a modern treatment plant, still contains a number of pollutants. These include fertilizers and pesticides from farming, runoff from landfills, chemicals from factories and underground storages, and pathogenic microorganisms.

QUALITY of drinking water is as important factor as its QUANTITY when it comes to your HEALTH. Hence installing a good water filtration system is the only way to proactively monitor and ensure the quality and safety of your drinking water.

So come to "Rite Water" ultimate in water purification, where the product water meets the best drinking water standards...
